How Can I Use AI to Draft Course Materials?

With the increasing prevalence of generative Artificial Intelligence (AI) tools like ChatGPT, the responsibility is falling on educators to adjust and familiarize themselves with a technology that is undeniably becoming as significant as calculators and computers in today's educational landscape.

Using AI in a teaching capacity offers educators various time saving and engagement enhancing benefits. This 20-Minute Mentor will serve as a go-to resource detailing the types of AI available for use, and helping educators pick and choose the right tools for their needs.

Upon completion of this program, you'll be able to:

- Understand the different uses for AI
- Implement AI to create and edit course materials
- Use AI effectively to leave more room for the human aspect of instruction
- Identify where AI is not perfect and needs human intervention
